

LAINOX ORACLE

For smaller bars, pubs, take-aways and quick-service premises the Oracle XS is a great addition. With a reduced footprint this can fit easily onto any surface and deliver fast and perfectly cooked foods. Designed also for front-of-house it operates ventless, without the need for expensive extraction systems. This also makes it ideal for mobile catering; plug in and serve up!

Its advanced technology allows you to use it as a convection oven or a fast microwave, or both. It will deliver fast: burgers in 120 seconds, chicken in 150 seconds, pizza in 90 seconds. **This is achieved by its unique design by engineers in Modena (Italy): 3x top mounted magnetrons that launch the microwaves directly at the product, speeding up cooking times and providing perfectly even results.**

Each oven comes with the Oracle Washable Box which inserts into the cavity and protects the walls from splashes; just pop it into the dishwasher and there is your fast and effective clean.

Features:

- 7" LCD colour touch screen
- Convection, microwave and impingement modes
- 1000w microwave
- Stainless steel construction
- Drop-down, disappearing door
- Wi-Fi and ethernet connection to Oracle virtual assistant
