**BOLOGNESE HEART,
ITALIAN FLAIR,
LEGENDARY STYLE.**

OUR ROOTS.

1950. Casadio was born in Bologna, a city renowned for its mechanical prowess and rebellious spirit. Nello Casadio, a self-made man and Casadio's founder, overlooked the first workshops production, where each piece was individually handcrafted.

Another reason why, from its inception, it has been a reliable entity, recognized for its top-notch bar equipment, especially coffee grinders, essential for serving excellent espresso coffee.

Our symbol is Neptune, the god of the seas, who's towered over Bologna's main square for five centuries. Every day, we strive to be the go-to reference for those seeking sturdy, reliable espresso machines and coffee grinders worldwide.

EASY
TO
USE

CASADIO NETTUNO

EMBRACE YOUR AMBITIONS. Casadio refreshes its range of coffee machines and introduces Nettuno. A modern and highly customizable design. Ergonomics and ease of use make it the best choice for those needing a high-performance and ergonomic espresso machine, without sacrificing style.

VERSATILE

BREW
A GREAT
CUP

MODERN TECH AND EASE OF USE.

Casadio Nettuno combines the best technologies and simplifies the barista's work, allowing them to focus on customers and optimize time.

INNOVATIONS FOR CONSISTENTLY GUARANTEED QUALITY.

STEEL BOILER

Ensures optimal performance and superior quality standards compared to any other material.

THERMOSYPHONIC THERMAL SYSTEM

Maintains the machine's thermal stability and excellent performance, even during peak times.

HOT WATER MIXER

Mixes cold and hot water to keep the perfect temperature, simplifying the barista's work.

NETTUNO

STEAM MILK LIKE A PRO.

The automatic Easy Steam wand ensures perfect milk frothing, consistently, even for less experienced baristas.

**DISCOVER,

AND TASTE
THESE RECIPES.**

BRIGHTEN YOUR SPACE WITH A STRIKING LOOK.

Casadio Nettuno introduces an entirely new aesthetic. From the presence of LEDs behind the buttons simplifying the operator's gestures to the ergonomic portafilters, enriched by the detail of the Casadio logo on the portafilter cap, right through to the actual design of the machine: modern shapes and the possibility of customizing the bodywork, make each machine unique and suitable for any location. Casadio Nettuno is available with fine white panels or elegant black ones.

TELEMETRY SYSTEM: CONVENIENT AND EFFICIENT.

Using the Wi-Fi module, available as a kit, you can connect CASADIO NETTUNO to the telemetry system with an intuitive and user-friendly APP*. Work and maintenance planning gets easier by having data on machine consumption (dispensing and washing) and remote diagnostics (alarm history) just a click away.

*APP not proprietary to CG.

EXCELLENCE MADE SIMPLE.

Every step of the way is sped up and eased down thanks to the new Human-Machine Interface, which has been designed for user-friendly navigation and intuitive recipe setting. A new graphic system guides the user through an improved User Experience in the use of all features, from brewing to Easy Steam and cleaning settings, as well as accessing consumption information. A whole new level of efficiency for a high-performance workflow.

WITH CASADIO,
STYLE GETS
EVERYWHERE.

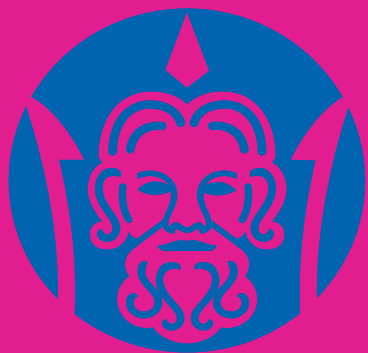

EXCELLENCE IN CAPS.

Casadio Nettuno offers a single-portion coffee solution, ideal for all those locations where coffee is not the core business.

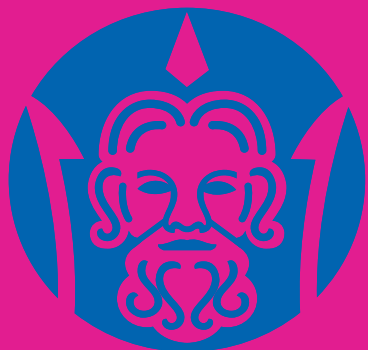

Thanks to various portafilter kits, Casadio Nettuno Caps can handle both paper pods and the most common types of capsules*. Moreover, the volumetric pump ensures a high-level extraction process, quietly and quickly. Accelerate the work pace and ensure a perfect brew.

*Portafilter kits compatible with different types of capsule pods available.

PLUG AND PLAY

BOUNDLESS FLEXIBILITY, LONG-LASTING AUTONOMY (CAPS MODEL EXCLUSIVE TECHNOLOGIES).

Casadio Nettuno CAPS is a PLUG & PLAY model: thanks to the water tank, there's no need for a water network connection or drain pan*. The three-liter tank ensures extended autonomy. The automatic control system alerts the barista - with a light indicator - once the tank's minimum capacity and the drain pan's maximum are reached. This way, you can act in advance without interrupting the workflow, also limiting the machine's wear. The tank is equipped with the Brita AquaAroma Crema filter, enhancing the water's purity for superior coffee quality.

*Alternatively, a water connection kit can be purchased.
